Find Out How You Can Save
On Your Energy Costs

631-242-8080

"Our objective is to provide you with the highest quality, most cost effective lighting solutions."

**Turn On
The Savings!**

Green Lighting

Reduce your costs
and your impact
on the environment.

Lighting the Way
To Energy Saving
Opportunities!

Reduce Your Electrical Consumption

Lighting costs are one of the most overlooked energy expenditures facing businesses today. They represent up to 40% of the electrical load of your building system.

An upgrade to an energy efficient lighting system from Roland's Electric, Inc. offers the greatest opportunity to reduce your energy costs and consumption. Our recommendations are offered as a 100% turn key installation with all costs and benefits broken out.

With the opportunity for energy savings and eligible utility and government rebates, pay backs of less than 3 years are commonplace. Put simply, putting off a lighting retrofit program represents a missed opportunity for your company.

- Reduce costs
- Improve energy efficiency
- Improve employee productivity
- Improve light quality
- Protect the environment

A ROLAND'S ELECTRIC LIGHTING EFFICIENCY INSPECTION IS AN EXCELLENT FIRST STEP IN ACHIEVING YOUR FACILITIES' COST AND ENERGY MANAGEMENT GOALS.

Roland's Electric, Inc. is a full service electrical contractor. Since 1953 developers, general contractors, and business owners have relied on us to provide prompt, professional service, installation, repair, upgrades and remodels. Our knowledgeable staff is dedicated to help our customers and community get the best value.

SAVINGS AND RETURN ON INVESTMENT

Controlling lighting costs is critical to managing your overall operating costs.

- Lighting and controls offer faster pay backs than virtually any other facility savings opportunity.
- Reduce lighting energy costs
- Reduce cooling costs
- Reduce maintenance costs
- Savings are measurable and verifiable
- You may qualify for additional incentives with rebates available through LIPA or the government

PROPERTY VALUATION

- Energy efficient lighting retrofits increase the valuation of your property for higher rental payments and resale-asset value increases tenfold for every dollar saved.

PRODUCTIVITY AND SAFETY

- Studies show that high performance lighting improves productivity an average of 3%
- High quality lighting improves facility safety, reduces quality incidents, improves attention, reduces worker errors, and increases occupant satisfaction.

ENVIRONMENTAL IMPACT

- Immediately reduce electric load, thus reducing the environmental impact of energy production.

SOCIAL RESPONSIBILITY

- Mainstream sustainability initiatives identify you as an environmentally responsible organization that is minimizing the impact on our environment.

WHAT TO EXPECT FROM THE LIGHTING INSPECTION PROCESS

FIRST THE INSPECTION . . .

Roland's Electric evaluates your lighting system for quality of light, fixture count, fixture type, and room specifics.

We will take into consideration your hours of operation and tasks being performed in your facility to ensure that the design selections are correct for the environment.

THEN SOLUTIONS ARE PRESENTED . . .

We then will provide a computerized energy and cost savings analysis with recommendations to improve the quality of your lighting with the best solutions for your facility.

We will provide you with implementation costs and potential rebates, allowing you to make a well informed decision.

ONCE YOU DECISION IS MADE . . .

When you have decided which solution best meets your objectives, we will provide installation; no worry about meeting codes or product disposal. We take care of all of that for you. We also offer complete post-installation maintenance, service and support.
